

Nycon-PETF (polyester) mini-fibers are engineered and manufactured for performance improvements for non-structural uses in a broad range of cement-based, asphalt-based or plastic-based applications. Nycon-PETF provides a basic polyester mini-fiber that offers good performance at a competitive price. For all of these applications Nycon-PETF mini-fibers can dramatically improve performance and prolong the service life of your products.

Benefits to Liquid and Hot-Mix Asphalt

- Prevent separation of asphalt from aggregate.
- Stabilizer in SMA (Stone Matrix Asphalt).
- Stabilizer in hot and cold liquid asphalt binders, fillers and sealers.
- Stabilizer in OGFC (Open Graded Friction Course).
- Doses typically 3% of products.

Benefits to cement-based and Concretes

- Easy to apply with handy toss-in bags.
- Versatile applications including slabs, walls, shotcrete and others.
- Reduces plastic and drying shrinkage cracking.
- Doses typically 1.0 pound/CY (0.6 kg/m³)

Benefits to Plastic

- Can reduce uses of petroleum by-products.
- Can increase MOE and MOR.
- Can increase ductility.
- Doses typically 10% of compatible products.
