

Nycon-E Fibers. Made Tough To Make Concrete and Mortars Tougher.

All you need—and all you need to know—to insure the durability of every composite you produce is Nycon-E glass fibers.

Nycon-E glass-reinforced cement products have been the basis for a building material that has changed construction throughout the world. Nycon fibers produce a tough concrete with superior serviceability. This, combined with its workability and a wide choice of finishes, provides a freedom of shape, form, and texture unmatched by any other reinforcing material.

Configured as continuous filament, glass chopped strands, as well as mat or mesh fabrics, Nycon fibers are ideal for ready-mix, precast, decorative, architectural, and do-it-yourself (DIY) applications.

Beneficial Properties of Nycon-E Fibers

- High filament count (220 – 330 M per kg)
- Greater tensile strength and high modulus for increased tenacity, ductility, toughness in concrete
- Plastic-shrinkage control
- Inorganic, non-combustible
- Cost effective

Nycon does a lot more than just sell you a solution. We also give you the promise of performance delivered. In addition to NyconE glass, we offer a comprehensive line of reinforcing solutions, including polypropylene, nylon, steel, and synthetic/steel blended fibers.
